By 1800, chimneys, smoke and swarming crowds of workers dominated Manchester’s landscape.

A bustling market town had transformed into the world’s first industrial city. The boom in textile production gained Manchester the nickname ‘Cottonopolis’. The pace of change was breathtaking.
HAS DEATH (IN A RAGE)

Been invited by the Commissioners of Common Sewers to take up his abode in Lambeth? or, from what other villainous cause proceeds the frightful Mortality by which we are surrounded?

In this Pest-House of the Metropolis, and disgrace to the Nation, the main, thoroughfares are still without Common Sewers, although the Inhabitants have paid exorbitant Rates from time immemorial!!!

"O Heaven that such companions thou'dst unfold.
"And put in every honest hand, a whip,
"To lash the rascals naked through the world."

Unless something be speedily done to allay the growing discontent of the people, retributive justice in her salutary vengeance will commence her operations with the Lamp-Iron and the Halter.

SALUS POPULI.

TRAFFIC IN TOWNS
This massive book is a novel about architecture. Conceived by Rem Koolhaas — author of Delirious New York — and Bruce Mau — designer of Zonen — as a free-fall in the space of the typographic imagination, the book’s title, Small, Medium, Large, Extra-Large, is also its framework: projects and essays are arranged according to scale. The book combines essays, manifestoes, diaries, fairy tales, travelogues, a cycle of meditations on the contemporary city, with work produced by Koolhaas’s Office for Metropolitan Architecture over the past twenty years. This accumulation of words and images illuminates the condition of architecture today — its splendors and miseries — exploring and revealing the corrosive impact of politics, context, the economy, globalization — the world.

**HOW IT WORKS**

Walk [Your City] helps you boost your community’s walkability, linking informational street signs for people with web-based campaign management and data collection to complement traditional approaches to wayfinding.

- **Plan and design your signs**
- **We’ll make and ship your signs**
- **Install on your city’s streets**
- **Walkers scan signs for directions**

**Experiment.**
Test with a pilot before you invest in more permanent pedestrian infrastructure.

**Engage.**
Create new, approachable opportunities for public participation.

**Encourage.**
Change community transportation choices for the better.

**Educate.**
Help both neighbors and visitors see that it’s not too far to walk.
Teşekkürler...
